

Plug any LLM into Sri Lanka's largest local e-commerce enterprise.

A **free public MCP server** for [Kapruka.com](https://mcp.kapruka.com). Search products, browse categories, quote delivery, create guest-checkout orders with click-to-pay links, and track existing orders — from Claude, ChatGPT, Cursor, or any MCP-aware client.

MCP ENDPOINT

<https://mcp.kapruka.com/mcp>

[Copy](#)

- Streamable HTTP transport
- No auth required
- 60 requests / min per IP
- 30 orders / hour per IP

Quick start

Drop one snippet into your client, restart, done.

[Claude Desktop](#)[Cursor](#)[ChatGPT](#)[MCP Inspector](#)

```
{
  "mcpServers": {
    "kapruka": {
      "url": "https://mcp.kapruka.com/mcp"
    }
  }
}
```

[Copy](#)

Save to `%APPDATA%\Claude\claude_desktop_config.json` on Windows or `~/Library/Application Support/Claude/claude_desktop_config.json` on macOS, then restart Claude Desktop.

Available tools

Seven tools for product discovery, delivery quoting, guest checkout, and order tracking — all return structured results in markdown or JSON.

kapruka_search_products

Search the catalog by keyword with category, price range, stock, and sort filters. Pagination capped at 3 pages.

```
q      category  min_price  max_price
in_stock_only  sort    limit    cursor
currency
```

kapruka_get_product

Full details for any product by ID — name, price, stock, variants, images, shipping, and a direct URL.

```
product_id  currency
```

kapruka_list_categories

Top-level category names with browse URLs — pass any name as the category filter to search.

```
depth
```

kapruka_list_delivery_cities

Search Kapruka's delivery network by canonical name or vernacular alias. Returns up to 50 matches per query.

```
query  limit
```

kapruka_check_delivery

Check whether an order can be delivered to a city on a given date, with the flat LKR rate and a perishable warning when the product code is a cake / flower / combo.

```
city  delivery_date  product_id
```

kapruka_create_order

Create a guest-checkout order and return a click-to-pay URL — no Kapruka account required. Prices are locked for 60 minutes, multi-currency, capped at 30 orders/hr per IP.

```
cart  recipient  delivery  sender
```

`gift_message` `currency`

kapruka_track_order

Look up status, recipient, items, and timestamped delivery progress for any Kapruka order. Customer reads the order number off their confirmation email or order complete page.

`order_number`

Free tier limits

- **60 requests per minute** per client IP across all tools. Standard `RateLimit-*` headers on every response.
- **30 kapruka_create_order calls per hour** per client IP, on top of the per-minute cap.
- **Guest checkout** — orders create a 60-minute click-to-pay link with locked prices. Customer pays in the browser without logging in.
- **Server-side cache** of up to 30 minutes for product / category reads — write endpoints are never cached.
- **Need higher limits, agent partnerships, or commercial integrations?** Reach out at hello@kapruka.com.
